26
27 ### W02-P3: debug -- 已經走過的，不能走，但是 turn 加 1，
28 下一步還是同一個 player
29
30 ![8.png](https://berldygauswlpplidqun.supabase.co/
31 storage/v1/object/public/demo-99/W02/8.PNG)
32
33 ### W02-P4: debug -- 已經贏了，還可以繼續往下玩
34
35 ![9.png](https://berldygauswlpplidqun.supabase.co/
36 storage/v1/object/public/demo-99/W02/9.PNG)
```

W02-P1: checkWin to determine who wins, you need to create four images as said in class

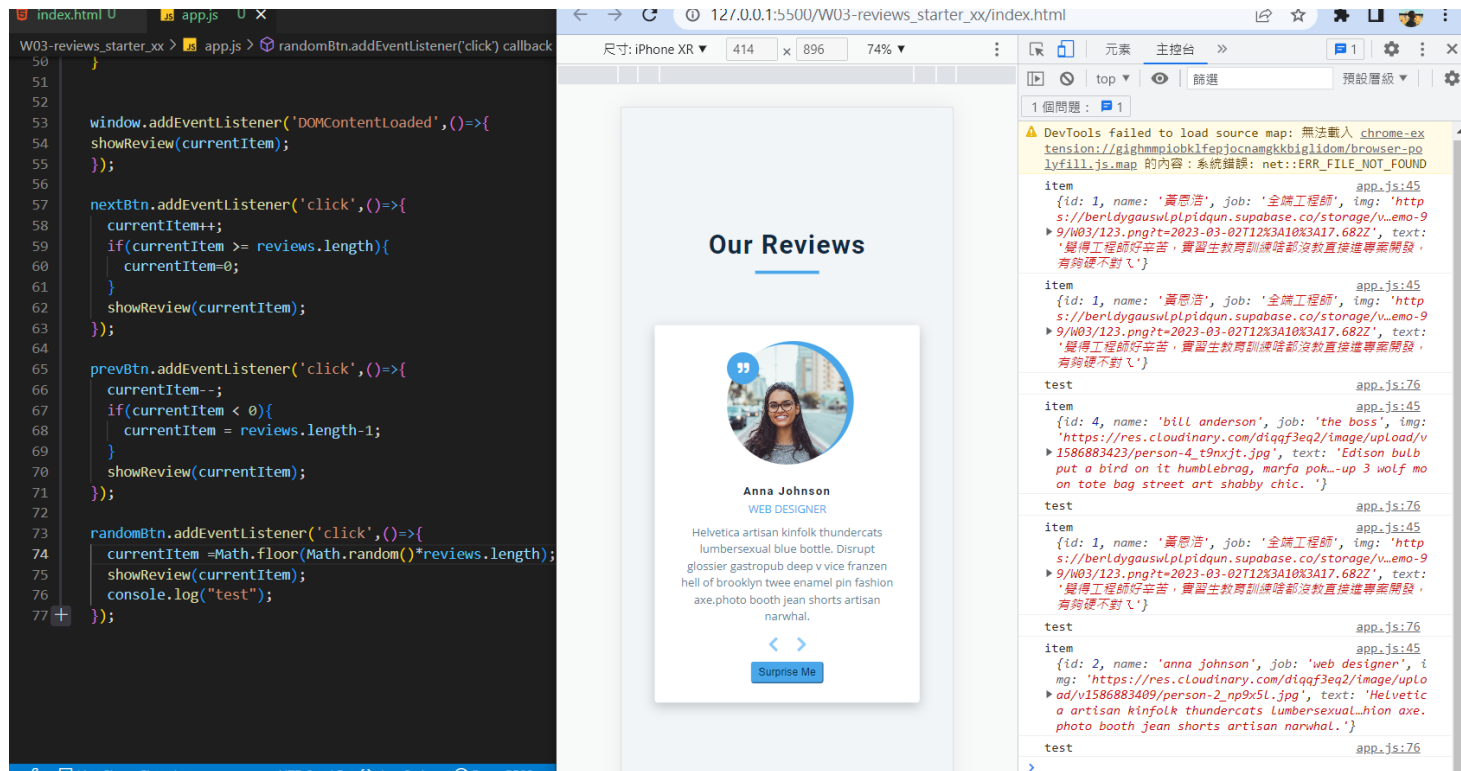

W03-P2: show reviews[0] info when DOM is loaded

The image shows a web development environment with three main components:

- Code Editor (Left):** Displays the JavaScript code for a review application. The code includes event listeners for a 'randomBtn', a 'nextBtn', and a 'prevBtn', all of which call a `showReview` function. The `showReview` function uses `Math.floor(Math.random() * reviews.length)` to select a random review from an array.
- Browser Preview (Right):** Shows the rendered web page. The page has a title 'Our Reviews' and a list of reviews. The first review displayed is by 'Bill Anderson', titled 'THE BOSS', with a description: 'Edison bulb put a bird on it humblebrag, marfa pok pok heirloom fashion axe cray tumptown venmo actually setan. VHS yr-tto-table schiltz, edison bulb pop-up wolf moon tote bag street art shabby chic.' The review is accompanied by a circular profile picture of a man.
- Console (Bottom):** Shows the output of the JavaScript code, including the selected review object and a log statement 'test'.

W03-P5: implement "surprise me" button and show the sequence in console.log

W03-P6: add your info as reviews[0] and show it
